

Free SPAX Screws

A few months ago I was looking for an inexpensive screw that wasn't so difficult to drill in wood. As I have educated myself in carpentry I realized that every piece that goes into my finished product is important. The wood screws I had been using kept stripping and required pre-drilling as well as a drill bit to counter sink the screw. This can make building a lengthy production!

I was on Amazon looking for a new screw and I came across the [SPAX Assortment Kit](#). For \$12 I honestly thought I'd give these screws a shot. They literally became a game changer in my building. Here's why:

[THE SPAX® ADVANTAGE](#)

Whether you're a professional contractor or weekend do-it-yourselfer, German engineered / American made SPAX® Multi-material Construction Screws and PowerLags® offer a wide selection of premium quality fastening solutions that help ensure professional results in less time than inferior imported screws. Often imitated, but never duplicated, the unique patented features of SPAX® fasteners reflect nearly two centuries of cold-forming engineering and manufacturing experience.

1. **Patented MULTIhead:**
Countersinks screw head flush with material.
2. **Patented serrations:**
Quicker and easier fastening.
3. **Patented 4CUT™ Point:**
No pre-drilling, no splitting. Square end divides fibers.

I have since invested in numerous types of SPAX products. My favorite are their T-Star screws. My drill bit fits perfectly into their star shape and makes fastening effortless!

I joined the SPAX family because I knew this was an awesome product I wanted to be involved with and that I would use for life. They've changed the way I build and they will change the way you build too! There's no commitment to try SPAX! Click [here](#) and their team will send you a sample pack so you can fall in love too!

The cost is efficient, the product is invaluable, and the customer service is flawless. Join me and SPAX in the next movement as we ["Do it once. Do it Right."](#)
